

ANNUAL REPORT ON EXECUTIVE COMPENSATION FOR CALENDAR YEAR 2009: INCUMBENTS IN CERTAIN SENIOR MANAGEMENT POSITIONS

EXECUTIVE SUMMARY AND BACKGROUND

As part of its commitment to transparency and public accountability, UC reports annually on compensation paid to senior managers. This report (Attachment 1) details all aspects of senior management compensation, and it is also posted on UC websites to provide public access to the information.

KEY POINTS ABOUT UC EXECUTIVE COMPENSATION FOR 2009

- **UC health sciences personnel and coaches remain the highest paid:** As in previous years, the top earning employees at UC in 2009 based on total compensation were either health sciences personnel, world-renowned specialists in their fields, or athletic coaches.
- **Executive compensation remains a tiny portion of payroll:** Senior management salaries continue to represent less than 1 percent of UC's total payroll.
- **No state funds for incentive/bonus compensation:** No state funds are used for UC incentive or bonus payments for clinical and health sciences personnel, or treasurer's office personnel. Compensation for coaches and other athletics personnel is paid from non-state funds, with the exception of one coach at Riverside, where less than half of his compensation comes from state funds.
- **Incentive compensation used to motivate excellent performance in support of University priorities:** Like many employers nationwide, UC uses incentive compensation plans to encourage and reward sustained individual and group performance in support of key University objectives:
 - **Medical centers:** Incentive compensation plans for UC medical centers cover employees at all levels – from clerical staff to senior hospital leaders – and reward individual as well as group performance in furtherance of key priorities such as improving patient care and safety, enhancing operational efficiency, and maintaining sound financial management.
 - **Treasurer's Office:** Consistent with industry standards, the Treasurer's Office incentive compensation plan motivates and rewards employees responsible for maximizing long-term total investment returns while assuming appropriate levels of risk, and promoting teamwork. Awards are paid out over three years to help retain strong performers, with unpaid amounts forfeited if the participant voluntarily leaves UC for reasons other than retirement.
 - **Coaches:** Coaches' compensation includes base salary and bonus and incentive compensation tied to revenue generated from television and radio contracts, marketing arrangements with equipment and clothing manufacturers, and summer sports camps. Other awards are tied to specific goals, such as winning a national championship, and are paid only if those goals are met. Other compensation may include signing or retention bonuses.

By the numbers: The 79 incentive and bonus payments in this report total \$3,863,027 – approximately .04% of UC's \$9 billion annual payroll. Payments from the Clinical Enterprise Management Incentive Plan (CEMRP) and the other clinical incentive plans represent 53% (\$2,051,458) of the total with the majority of the balance attributed to bonus and incentive awards earned by coaches.

Salary Reduction and Furloughs: As a result of significant deficits caused by the substantial reduction in state funding for the University, a number of measures were taken to reduce costs. In June, the President, Chancellors, Executive and Senior Vice Presidents, and certain Vice Presidents at the Office of the President volunteered to take a 5% salary reduction. Following that, the Regents approved a system-wide furlough plan to further offset the impact of state budget cuts. The plan, which applied to a large number of University employees, imposed salary reductions ranging from 4 percent for employees at the lowest salary levels up to 10 percent for executives. These salary reductions began September 1, 2009 and will continue through August 31, 2010. The furlough plan and other associated actions are projected to save the University approximately \$184 million.

Most employees included in this report, including all Senior Management Group (SMG) members, are subject to the furlough plan. Because the terms and conditions of employment for coaches are governed by their respective contracts, they were not subject to the furlough plan; however, many of them volunteered to participate and took a salary reduction. In order to preserve patient safety, medical center employees other than SMG members are not subject to the furloughs. Instead, the medical centers have developed alternative plans to generate savings comparable to those being achieved at the campuses by the furlough plan. The non-SMG staff in the Treasurer's office are also exempt from the furloughs because their operations require trading and close management of the investments throughout the week; however, all SMG members in the Treasurer's office are subject to the salary reductions. Academic and staff employees at the Lawrence Berkeley National Laboratory were excluded from the furlough plan because their compensation is entirely funded by research and extramural funds from sources such as government and private contracts and grants.

For each employee included in the report who participated in the furlough plan, the report reflects the percent of their salary reduction and the number of furlough days accorded to them. Please note that the annualized base salary figures in the report do not reflect those reductions.

Information on the Incentive Plans

Clinical Enterprise Management Incentive Plan (CEMRP) and Other Clinical Incentive Plans: Under the authority granted by The Board of Regents to the President in 1992, the purpose of CEMRP and other similar clinical incentive plans is to provide variable, non-base building awards to those employees responsible for attaining or exceeding key Clinical Enterprise objectives consistent with University objectives. Achievement is measured based on specific financial, non-financial/quality, and strategic objectives which relate to the Clinical Enterprise's mission and goals. These plans focus participants on the achievement of local and system-wide institutional objectives to encourage teamwork and to recognize the joint effort required to meet

challenging organizational goals. They also use individual performance measures to encourage participants to maximize their personal effort and to demonstrate individual excellence. CEMRP is a key component of the overall competitive compensation for leadership at the medical centers. The program rewards participants for their performance in furtherance of important goals such as improving the quality of care, patient satisfaction and safety, as well as for attaining or exceeding key financial objectives. This program and the other clinical incentive plans are funded through clinical revenues and do not use state funds.

There are two important notes to make regarding CEMRP and other clinical incentive plans represented in this report. First, some amounts include awards for both the 2007-08 and 2008-09 performance years. The 2007-08 awards for these employees would have normally been approved and issued in September 2008; however, many bonus and incentive awards were deferred for consideration by the Regents until January 2009. In light of the significant budget crisis facing the University, the Regents then issued a series of actions restricting compensation actions for senior managers and restricting or eliminating bonus and incentive awards for an even broader population of University employees. CEMRP and other similar clinical incentive plans were authorized to continue, but the delay in the Regents' approval of the 2007-08 awards meant that they were not paid until calendar year 2009. Second, the 2008-09 CEMRP awards for SMG members were recently approved by the Regents at the January 2010 meeting. Although those awards are for the 2008-09 performance year, they were not included in this report because they were not paid during calendar year 2009. The 2008-09 CEMRP awards for all SMG participants will be included in the 2010 Annual Report on Executive Compensation.

Treasurer's Annual Incentive Plan (AIP): Under the authority granted by The Board of Regents, the purpose of the AIP is to provide variable, non-base building financial awards to those employees responsible for attaining or exceeding key objectives in the Treasurer's Office which are consistent with University investment objectives. Under the Plan the performance of the University's investment portfolio, the performance of various groups within the Treasurer's Office, e.g., those responsible for management of particular asset classes, and the performance of the individual participant are considered. Award amounts are based on the achievement of specific investment, non-financial, and strategic objectives relative to the mission and goals of the Treasurer's Office. The Plan focuses participants on maximizing long-term total returns for all funds managed while assuming appropriate levels of risk. It is intended to support teamwork so that members of the Treasurer's Office operate as a cohesive group. The payouts under this plan do not use state funds.

This plan, like CEMRP and other clinical incentive plans, was authorized by the Regents to continue in 2008-09 and 2009-10. However, the Regents deferred consideration of the 2008-09 awards from the September 2009 meeting to the March 2010 meeting. Because the 2008-09 awards under this plan were not approved or awarded in calendar year 2009, they are not included in the report. Any 2008-09 awards that are approved for participants will be included in the 2010 Annual Report on Executive Compensation. AIP awards are reported in the year in which they are approved even though only one third of the award is paid in that year, one third is paid the following year, and the final third is paid the year after that. Payments made to AIP participants in 2009 for awards earned and approved in prior years are not included in this report because they were already reported in those prior years.

REPORT FORMAT AND CONTENT

The content and layout of this report, compliant with legislative reporting requirements, was approved by The Regents at the January 2007 meeting. This report presents the following information for calendar year 2009:

Population covered: This report includes all incumbents in the “senior officials” listing as referenced in the Budget Act. This report also includes the population for which Regental review and approval of any compensation actions are currently required, e.g., those administrators in slotted positions and those who are not slotted, such as coaches, whose potential total cash compensation exceeds the current reporting threshold of \$214,000.

The attached report displays compensation details on over 500 active University employees. These employees include those in acting capacities and those who stepped down but remain affiliated with the University. The AREC population does not include University separated employees. If an employee held more than one position during 2009, e.g., he was Acting Dean and then was appointed Dean, each position is reported.

Cash compensation: The report presents compensation using the following categories: annualized base salary, annualized stipends, actual payments received under incentive or bonus programs (see next section for more detail), total actual Health Sciences Compensation Plan (HSCP) payments (see below for more detail), and other cash compensation or cash payments. A subtotal of these elements is also provided for each employee listed. Please note that this information is a combination of data that represents actual payments and annualized figures. The annualized figures for base salary and stipends are used instead of actual compensation to ensure that relevant information regarding partial year assignments is provided. For example, actual 2009 compensation for an employee who starts employment with the University in November with an annualized base salary of \$240,000 would be only \$40,000. Because many stipends were only paid during just a portion of 2009, the annualized stipend amounts reported are much higher than the amounts actually paid during 2009. Annualized stipend figures are reported even for situations where the total stipend period was less than a full year.

Incentive and Bonus Compensation: The incentive and bonus payments represented in the report can be categorized into one of the following: Awards to coaches and awards from the Clinical Enterprise Management Recognition Plan (CEMRP), other clinical incentive plans, the Treasurer’s Annual Incentive Plan (AIP), and local bonus and incentive plans. With the exception of an award to one coach and possibly one award of less than \$1,000 made under a local bonus plan, no state funds were used for the awards listed in the report.

There are 79 incentive and bonus payments in this report, totaling \$3,863,027 – approximately .04% of UC’s \$9 billion annual payroll. Payments from the Clinical Enterprise Management Incentive Plan (CEMRP) and the other clinical incentive plans

represent 53% (\$2,051,458) of the total with the majority of the balance attributed to bonus and incentive awards earned by coaches.

Awards paid to Coaches or other Athletics Personnel: The compensation for coaches is comprised of a base salary plus various types of bonuses and incentives. These bonuses and incentives are recognition awards tied to revenue streams from contracts with television and radio, marketing arrangements with equipment and clothing manufacturers, and summer sports camps. Other awards are based on specific performance goals and are only paid if the goal is attained, e.g., winning the national championship. Other forms of bonuses may include signing or retention bonuses.

The coaches in this report were paid from non-state funds, generally from specific gifts and donations or sports-related revenue sources, with one very limited exception. One Riverside coach was paid using state funds, but that amounted to less than half of his total compensation. State funding is generally not a source for coach compensation. There are 26 payments (approved by the Regents or under their delegated authority) reported in this category, totaling \$1,811,569 (46.9% of total payments reported).

The compensation for coaches is tied directly to market demand, with a coach's success driving the demand. As winning records increase, national attention brings employment opportunities, which may require adjusting compensation terms in order to retain successful coaches. When hiring a new coach or retaining an existing coach, the market demand for their services necessarily plays a role in determining the compensation offered by the University. In addition, the compensation offered to UC coaches is aligned with other coaches in the PAC-10 with comparable win/loss records.

Other Local Incentive and Bonus Plans: Provisions for payments made under local incentive plans vary by plan. Please refer to the report comments and addendum for details regarding each payment. This year there is only one such payment, in the amount of \$978, included in this report. Payments in this category that are made under the Staff Recognition and Development Program (SRDP) or other similar locally funded programs may use state funds.

Health Sciences Compensation Plan: Health Sciences Compensation Plan (HSCP) payments are provided and displayed in a separate column for those employees who participate in this program. The amounts displayed in this column reflect actual payments to the employees and include income processed through the HSCP, per policy, from qualified outside activities, such as clinical services, research, and speaking engagements. Because an employee's outside activities fluctuate from year to year, the HSCP payments may also fluctuate accordingly. This report reflects 19 employees receiving payments under the HSCP totaling \$1,459,566.

This program is under the authority of The Regents of the University of California and was established in 1995 to create a mechanism by which UC faculty in clinical departments can be paid from revenues derived from the delivery of health services or

research, thereby making their compensation more competitive with wages paid by other institutions in the health care market in and outside of California. Because income from services varies considerably between healthcare disciplines (e.g., nursing, dentistry, medicine, public health), the HSCP is designed to apply across a wide spectrum of health care providers and administrators of clinical programs. The funds distributed from the HSCP are not derived from state sources.

One-time payments/reimbursements: These payments are made to the employee or to a third party vendor on behalf of the employee. They include relocation allowances, temporary housing reimbursements or allowances, and moving expense reimbursements. Some of the information displayed in this section is described in more detail in the Addendum, which is provided as Attachment 2.

Benefits and perquisites: This category includes leased auto expenses, auto allowances, senior management benefits (including some or all of the following: life insurance, executive business travel insurance, and executive salary continuation for disability), University-provided housing, severance benefits, senior management supplemental benefit program contributions, additional post-retirement benefits (including medical coverage, enhanced retirement income benefits, and enhanced retirement vesting schedules), and home mortgage loans provided under the University programs. For home mortgage loans, the original loan amount is reported. Auto allowances are reported as annualized figures. In some cases, employees received the allowance for less than the full year, but the annualized figure is still reported.

Data Collection, Review, Audit and Certification Process

This Annual Report on Executive Compensation was produced from data collected manually by each campus, medical center, and laboratory using a variety of sources, such as payroll, accounts payable, and personnel records, to populate a data warehouse, the Senior Leadership Information System (SLIS). Multiple data quality reviews were conducted by the Office of the President (OP) and local entities. The first certification occurred at the individual level when each person received a report from SLIS displaying his or her data and was asked to certify that the information was accurate and complete. In addition, campus and OP auditors reviewed the population and data to validate the accuracy and completeness of the data. Each Chancellor and the Lab Director reviewed their location's data and certified it to be accurate and complete. Thereafter, the President certified the contents of the report.
